EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
MCA(AI & IoT)	National Institute of Technology, Patna	7.41*	2027
B.Sc	RANCHI UNIVERSITY,RANCHI	67.03%	2024
Senior Secondary	RLSY COLLEGE JHUMRI TELAIYA	67.8%	2020
Secondary	ST STEPHEN'S SCH CHMPA HAZARIBAGH JH	42.8%	2018

PROJECTS

- Project 1: Predictive Analytics for IPL Matches with Machine Learning** Aug 2025 - Sep 2025
Tools: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
 - Developed a machine learning pipeline to predict IPL match outcomes.
 - Collected and preprocessed historical match data, player statistics, and team performance metrics.
 - Conducted Exploratory Data Analysis (EDA) to identify patterns and trends.
 - Implemented multiple ML models: Logistic Regression, Random Forest, and XGBoost.
 - Tuned hyperparameters to enhance model performance and prediction accuracy.
 - Visualized trends and model results using data visualization libraries.
- Project 2: Telemedicine Web App: Appointment Booking Web Application** Mar 2025 - Apr 2025
Tools: HTML, CSS, Javascript, Bootstrap, MongoDB, Express.js, React.js
 - Developed a full-stack Telemedicine Appointment Booking Web Application using the MERN stack (MongoDB, Express.js, React.js).
 - Designed and implemented secure RESTful APIs for user authentication, appointment scheduling, and data management.
 - Built responsive and interactive React.js UI components for patients and doctors.
 - Implemented JWT-based authentication and role-based access control (Doctor/Patient/Admin).
 - Integrated MongoDB for efficient storage of user data, appointments, and medical records.
 - Developed real-time communication features (chat/notifications) to enhance user interaction.

SKILLS

- Programming Languages:** C , C++, Python, JAVA
- Machine Learning:**Supervised Unsupervised Learning, Regression, Classification
- Deep Learning & NLP:** Neural Networks (CNN, RNN, LSTM, Transformers),Text Processing,Sentiment Analysis
- Libraries & Frameworks:**TensorFlow, Scikit-learn, Pandas, NumPy
- Data Analysis:** Python (Pandas, NumPy), Data Visualization (Matplotlib, Tableau), Statistical Modeling
- Tools:** Jupyter Notebook, Google Colab, VS Code, PyCharm, Git, GitHub
- Web Development:** HTML, CSS,Bootstrap, Express.JS, React.JS
- Database:**MySQL,MongoDB

CERTIFICATIONS

- GURUKUL, C , C++** 2020

ACHIEVEMENTS

- AIR-523 , NIMCET 2024
- Solved 300+ LeetCode Questions
- 5 star in c on HackerRank
- State Level Scholarship in 2016
